Phil,

You had asked me a couple weeks ago who was the Department's contact for the Bristol Bay Watershed Assessment that EPA is conducting. Kerry Howard is the contact, although Al Ott participated in some meetings for her while she was on extended leave. Kerry mentioned that the last email she had on the process was regarding a February meeting. Have there been updates or developments since then? Regardless, Kerry is your contact for any current or future activity on the watershed assessment.

Mike
